## LETTER OF RECOMANDATION

August 12, 2016

To Whom It May Concern:

Mr. Łukasz Kozłowski was engaged by Siemens Poland Ltd. as Site Construction Engineer for the construction of the new 138 MW CCPP Gorzow (Combined Cycle Power Plant).

He represented the Company PM Group and was responsible for managing and coordinating project works for the following since September 2015:

- Management of civil discipline – main and secondary steel structure, platforms, painting, cranes/gantry, hoist beams, roof insulation, wall cladding, finishing works
- Management of mechanical discipline - building technology : HVAC, fire fighting, gas extinguishing, fire protection system, gas detection system, extinguishing sprinkler system transformer and steam turbine areas; BMS system monitoring, general electrical installation
- Implementation and adherence of Siemens HSE ( Health, Safety & Environment ) standards, policies and plans including subcontractor HSE supervision in the day to day business
- Support final acceptance team to complete ITP( inspection test plan) that inspections are carried out according to the ITP with client and contractors.
- Support team to complete ITP documentation including certificates together with Declaration of Conformity and Certificate of Conformity
- Support to complete red-lining of concerned detailed design documentation, signed by designer
- Creates and follow up punch list works for outstanding issues
- Taking control over : quality, bill of quantities, schedule time, as-built documentation

Mr. Łukasz Kozłowski has always worked professionally along with excellent work and social ethics during his engagement on site. His works have been well acknowledged by the representatives of the final customer PGE and the Siemens site management team.
